

Results of the 2010 CQ DX Marathon

BY JOHN SWEENEY,* K9EL/VA3CDX

Participation in the 2010 CQ DX Marathon was up significantly despite some of the worst band conditions in years! Excluding the new PJ countries, there were actually two fewer countries available compared to 2009. However, there were 58 countries with no activity at all in 2010! Overall not the best year for DXing, so the competition was as fierce as ever. There were significantly more people with higher scores, so those countries that *were* active were in many logs. In the end, taking into account the new PJ countries, the winning 2010 score in the Unlimited Class was identical to the winning 2009 score.

Logs were received from 62 countries and 28 zones—a nearly 30-percent increase over last year. Once again the majority of the logs (75%) were Unlimited Class. 60 percent of the logs came from three countries—USA, Brazil, and England—with participation from England up over 100 percent from 2009. We even had one SWL entry this year. The competition for certificates was especially exciting in 2010, as there was a 25-percent increase in the number of single-mode submissions and a 50-percent increase in QRP (10 watts or less) submissions. As the DX Marathon rules were not clear on multiple entries and multiple certificates, a clarification was published earlier this year. Please see sidebar.

And the Winners Are...

Once again Bob Locher, W9KNI, was the top scorer in the Unlimited Class with a score of 325. Bob worked 285 of the 291 countries that were available in 2010, as well as all 40 CQ zones. Congratulations to Bob on winning two years in a row! PP5EG, OM3EY, and NØFW were not far behind with scores of 323, 320, and 318, respectively. Bob's last new one was worked at 2200Z on December 31st, so he obviously was very active right to the end of the contest! Competition in Formula Class was just as competitive, with Bernhard Wittek, DL4CW, claiming the Formula Class plaque with a total score of 254, four points ahead of the runner-up, KØABC. Congratulations to all of our Formula Class participants.

Once again the plaques for the winners in both classes will be provided by the Northern Illinois DX Association. We sincerely appreciate their support for sponsoring the DX Marathon plaques.

Major certificate winners in 2010 include Joe, W1JR, who came out on top in the CW competition at 305 points; David, N3CDA, who took top SSB honors with a score of 286; and Mark, K7MTR, who topped the digital-mode competition at 237 points. Fantastic single-mode scores and all higher than 2009. Notable in the single-band competition was Mike, K5NU, who amassed an amazing score of 243 points (205 countries/38 zones) on 80 meters! We had our first 10-meter-only submission. Hopefully, we will see more higher band submissions as the sunspots improve.

Each year has its unique problems and 2010 was no different. Last year, many participants lost points due to incorrect call signs for zones 2, 3, 4, 5, 17, 18, and 19. I am pleased to report that the number of zone errors was down by 90% this year.

*Program Manager, CQ DX Marathon
e-mail: <K9el@dxmarathon.com>

Hopefully, each of our participants will continue to use the information available on the DX Marathon website (www.dxmarathon.com).

Unfortunately, a new problem evolved in 2010—incorrect postings on DX spotting networks. Please listen carefully to the station you are working, as the call on the cluster may not be right. Many submissions included “JX/G3PJT,” which was called in many times. Unfortunately, G3PJT was actually at J6. 5N7M

Bernhard Wittek, DL4CW, took home top Formula Class honors in the 2010 CQ DX Marathon with a total score of 254 points.

Bernhard Wittek, DL4CW Formula Class Winner

Bernhard became interested in radio at a very young age, listening to shortwave broadcasts on his parents' tube receiver. At age 12, he attempted an amateur license but was distracted by other interests. After many years of SWLing, Bernhard finally got his ham license in 2004. His passion for SWLing quickly turned to a passion for DXing. Bernhard operates an IC-751A transceiver to all homebrew antennas. Currently his antenna farm consists of a 33-foot vertical and a 90-foot Zepp. Bernhard operates primarily CW and RTTY and is an avid QSL collector. He is also licensed in the U.S. as N4FC. Bernhard said he came across the DX Marathon accidentally a few years ago, noticed that his score was quite good and made a real effort in 2010.

Bernhard is an active participant in SOTA (Summits On The Air) and the photo in this article shows Bernhard on one of his expeditions in Austria.

was called in as HN7M, 5T7M, 5U7M, and several other variations. WH6R was called in as WH8R as another example. Although actual pirate activity was down in 2010, there is still confusion with the E51 prefix and European Turkey. Please check callsigns carefully for the correct country! Many stations claimed credit for various EZ stations, but neither the DX

Marathon committee nor the ARRL has been able to receive any official information regarding the validity of the EZ stations that are currently active. For 2010, the lack of approval for EZ contacts did not have any significant impact on the final results.

Many submissions were received marked as Formula Class, but were actu-

ally Unlimited Class based on the types of antennas used. Simply limiting power to 100 watts does not necessarily qualify a station for Formula Class. Please read the DX Marathon rules carefully regarding the types of antennas and power allowed for Formula Class. And finally, don't forget that the CQ countries list includes additional valid countries that are not part of the ARRL DXCC program. Since most logging programs use the ARRL list, don't forget to work TA1 (European Turkey), IT (Sicily), IG9/IH9 (African Italy), and others. For complete details, please go to <www.dxmarathon.com>.

See our expanded results on the CQ website (www.cq-amateur-radio.com) web for QRM and additional score breakdowns.
 73, John, K9EL/VA3CDX

**DX Marathon Clarification
 on Multiple Entries and Awards**

For those of you who may have missed this in the April issue, the following clarification to the CQ DX Marathon rules is effective immediately.—ed.

Each entrant may submit one log each year per operating location. Plaques are awarded for the top score in Unlimited Class and in Formula Class. In addition, certificates are awarded to qualified participants in this order:

- Top Score—Country
- Top Score—Zone
- Top low power (10 watts or less) score in Formula Class
- Top Score—Single mode entry (SSB, CW, Digital)
- Top Score—Single band entry

Plaque winners are not eligible for certificates. Only one certificate will be awarded per entrant. In the case of a participant qualifying for more than one certificate, that participant will receive a certificate for the highest level based on the above order. At the discretion of the DX Marathon Committee, a certificate may then be awarded to the next qualifying entrant(s) in the additional category.

www.buddipole.com

BUDDIPOLE FEATURES

- > Multi-band design works 9 bands (40 meters thru 2 meters) with one set of adjustable coils!
- > Rated from QRP to 250 watts PEP
- > Modular Design - create dozens of different antennas with interchangeable parts
- > Rotatable/Directional
- > Lightweight, rugged components
- > Rotating Arm Kit allows users to instantly change antenna configurations
- > Used by Emergency Services Groups throughout the world

See our videos

BATTERY PACKS

Custom manufactured A123 Nanophosphate battery packs for all portable radios. These batteries provide unparalleled performance in the field. See our website for more details.

WHAT IS THE BUDDIPOLE?

The Buddipole™ Portable Dipole fits in your travel bag and assembles in minutes. The Buddipole is more than an antenna, it's a versatile system for launching your signal. Optimized for transmit power and proven for DX work, the Buddipole is the secret weapon used by HF portable operators all over the world.
